

Describe a quiet place you found

You should say:

Where it is

When you like to go there

What you do there

Why you like to visit there

Sample 1

I would like to talk about Zhejiang Library, which is a very quiet place that I enjoy going on weekend.

This library is located in the city center. therefore, it is quite convenient for me to get there.

I usually go there on weekend because there are many study rooms available at the library where I could study by myself.

I usually spend a whole afternoon there because I could finish my homework within 4 hours when I am studying at the library but it would cost much more time if I do my homework at home.

I really like to go there because the study environment is very good because there are many other students who are very hardworking and focused are also studying there. Also, I could borrow many interesting novels for casual reading when I am there.

Sample 2

I would like to talk about café, which is a very quite place that I found.

This café is located away from the city and I got to know this place because the owner of the café hired me to design a logo for him last summer when he just opened the place.

I really like the place because it is very quite since not many people would go there and the environment is better because there is no pollution in the countryside.

I would go there from time to time because I think it's a great place to think if I need some personal space. and I became friends with the owner. Therefore, I would go there regularly, specially when I need to work on a project or to get away from the stress. I have kept this place a secret to myself because I don't want too many people disturb me.
