What are the differences between big shops and small shops?

- **Well, compared with** big shops, small shops definitely have smaller range of goods, since they only focus on daily necessities, like veggies, snacks, beverages, kitchen stuff and so on.
- **Besides**, unlike small shop, big shop tends to have lower price due to their bargaining power.
- **What's more**, it may take a longer time to shop in a big shop, meanwhile a small shop is much handier. For example, suppose that i am cooking and I realise that I have run out of salt, and it is impossible for me to get it from Carrefour, since it is too crowded at the time, but fortunately, the grocery store on the first floor could help deliver it straightaway.

Should all children learn how to play a musical instrument?

- Well, it depends.
- For kids who are interested, we should give them a try to see how good they can be, since interest is the best teacher.
- Yet for those who are not interested, I don't think compulsory teaching will be a good idea, since people are born with different talents, and they might do better in sports or handicraft rather than playing the piano or violin.
- So it totally depends on their preference and choices.
