

**Describe a building you like**

You should say:

Where it is

What it is used for

What it looks like

And explain why you like it

**Sample 1**

I would like to talk about the National Grand Theater, which is a very special building that I like.

The theater is centrally located in Beijing near the Forbidden city, and now it has become one of the landmarks in Beijing.

The theater is mostly used as an opera house and could contain over 5,000 audiences at the same time.

The exterior of the theater is made of a special glass, and it is surrounded by a man-made lake. Therefore, it looks like a rain drop on water.

I am impressed by this building because I think its design is very edgy and it is now widely considered as an iconic architecture masterpiece. I was surprised when I first saw it in person, and then I did some research on this theater. It was actually designed by a famous French architect.

**Sample 2**

I would like to talk about a church I saw when I was traveling in France, which is the most impressive building I saw in person.

I visited France with my parents last summer, and we went to see a church near the border between France and Germany.

It was built about 500 years ago, and even though it looks very shabby from the outside, I was totally amazed when I got in the church. The church is decorated with stained glass, which makes the church look sacred. What's more, there is a huge church bell on the roof, which is very astonishing.

I really like this church for two reasons.

First, I think this church made me feel the power of religion, and I felt that my soul was cleansed when I was there.

Second, I really liked this church because it was the most beautiful gothic building I saw in person.
